

# PIPA Hub: Minimum Supported Specification

The PIPA Hub uses real time connections and the latest coding available in web development to ensure it remains up to date with advancements in technology.

The web development team provide support for the 'last three' versions or devices, as this is standard industry practice. This means that if you are using a version or a device not listed below, it is not supported.

Note: a non-supported version/device may continue to work, but it does mean that if you experience an issue the web developers are unable to support a fix as they are unable to recreate the issue.

PIPA recommends you keep automatic updates switched on, and you routinely check your device is up to date.

## **Supported Devices / Versions - Last updated: 6<sup>th</sup> February 2025**

Android: 12 / 13 / 14

iOS: 16 / 17 / 18

Chrome: 121 / 122 / 123

Firefox: 122 / 123 / 124

Edge: 121 / 122 / 123

Safari: 16 / 17 / 18
